Dr. Mark Crapo

"Do you want to feel and look better - find out how you can by using Symmetry health products."

Carbohydrates in the form of starches and sugars are quite abundant in the American diet; intake from foods such as bread, pasta, rice, cakes and cookies make it difficult to maintain any healthy weight management program. If you prefer a high protein, low-carb diet to lose weight, Carb-Less is for you!

CarbLess is a revolutionary formula that naturally supports a low-carbohydrate diet by reducing the breakdown as well as the absorption of carbohydrates, and supporting normal insulin activity for appetite containment. CarbLess supports weight loss by encouraging your body to burn stored fats first, and also reduces the amount of carbohydrate you digest, making fewer carbohydrate calories available.

Cut down carbohydrate intake with Symmetry's revolutionary CarbLess formula!

### ▶ CarbLess Features: Blood sugar support:

- Assists the body in the efficient uptake of sugar into the cells for immediate use as energy. Contains chromium, vanadium, gymnema sylvestre, Glucosol, fenugreek, bitter melon and lycium.
- Effective appetite control: Supports normal insulin activity, reducing appetite and cravings between meals. Insulin is a hormone that promotes the uptake of glucose by the cells of the body. The cells can then use the glucose for energy, or if in excess, convert it to fat for storage. By enhancing the activity of insulin, the glucose gets into the cells and they feel "full" thus reducing appetite and cravings.

- **Anti-Carbohydrate Absorption:** Phaseolamin inhibits the activity of carbohydrate-digesting enzymes in the GI tract (the enzyme that breaks down starches into simple sugars for absorption) leaving the carbs in a state that is too large to be absorbed.
