Dr. Mark Crapo

"Do you want to feel and look better - find out how you can by using Symmetry health products."

Water is the most important ingredient in life; the value of water to our health is one of the most fundamental aspects of medical science. More than 70% of our bodies consist of water, and the functions in our bodies are designed to run on water that is rich with the earth's natural mineral resources, not water laced with toxins. The last century has revealed a great increase in the number of toxic chemicals in our water supply. A recent Ralph Nader report revealed that over 2,100 cancer causing chemicals have been found in U.S. drinking water.

The clear solution to the ever growing issues of contaminated water is Symmetry's state-of-the-art Water Enhancement System. It uses the most advanced technologies, inspired directly by nature, to ensure you intake the purest water available. The WES-10 Deluxe Water Enhancement System has a unique filtration system, making certain to maintain the benefits of natural, non-toxic spring water for your health and safety.

**▶ You Are What You Drink...Symmetry's Countertop Water Enhancement System is the best solution to enjoy great-tasting, clean water.**

- Uses a multi-stage filtration process, featuring granular activated carbon, ATS lead-reduction media and polymeric mesh to remove contaminants and sediments from drinking water, while reducing unpleasant tastes and odors.
- Reduces levels of chlorine, lead and Lindane (a common pesticide) by more than 90% and significantly reduces MTBE.
- Provides refreshing, delicious, clean drinking and cooking water for just pennies a gallon - far less than bottled water or other home systems.

- Easy to install to kitchen faucet.
- Built-in bypass valve allows you to switch between filtered and unfiltered water.
- Constructed of FDA-compliant materials, including 100% recyclable ABS food-grade plastics, assembled and sealed via ultrasonic welding; eliminates the need for toxic glues or adhesives.
- Certified by Underwriter Laboratories, Inc. and the Water Quality Association
- Rated for 5,000 gallons (although in order to get certification it had to be effective for at least twice the amount!)
- Delivers clean water to a retail customer at a cost of just 5.5¢ per gallon (at 5,000 gallons) to as low as 2.7¢ per gallon (at 10,000 gallons).

## Questions and Answers

Q: If the countertop system is rated at 5,000 gallons, how do I know when the filter should be replaced? What criteria was used to determine these capacities? Is a flow meter available?

A: The countertop was certified at 5,000 gallons. The testing protocol required units making health claims to successfully perform to 200% of their rated capacity. In other words, we tested to 10,000 gallons to get a 5,000 gallon claim. Totalizing flow meters, which show the number of gallons processed, are very expensive, so instead we recommend that the entire WES-10 unit be replaced every 3 to 5 years.

Q: Does the countertop system filter mercury?

A: The Countertop System WES-10 is effective at reducing levels of mercury and cadmium as well as lead. This is due to their similarity with regards to the periodic table.
